FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or accepted by the U.S. Environmental Protection Agency. This product bulletin must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

Use on Pre-Plant Dip Treatment to Control:

Pythium, Phytophthora, Rhizoctonia, Fusarium or Thielaviopsis

Directions For Use:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product bulletin contains new or additional directions for use which are recommended by BioSafe Systems, LLC. under FIFRA Section 2(ee).

Pre-Plant Dip Treatment

Use ZeroTol 2.0 for the control of damping-off, root disease and stem rot disease caused by Pythium, Phytophthora, Rhizoctonia, Fusarium or Thielaviopsis, on seeds, seedlings, bulbs, or cuttings. Remove dead or dying foliage prior to dipping.

1. Use a dilution of 1:100 – 1:300 or 64-21.3 fl.oz. of ZeroTol 2.0 per 50 gallons of water. Use lower concentrations i.e, 1:250-1:300 or 25.6 fl.oz.-21.3 fl.oz. per 50 gallons of water for sensitive seedlings or cuttings.
2. Immerse plants or cuttings; remove and allow to drain. Do not rinse.
3. Excessive foaming or bubbling during the dipping process is an indication of high levels of disease contamination.
